

# Asterix

Introducing HSR Seeds 83 day starchy silage corn. Very quick silage maize or grain that fills the void for growers that want to double crop, or plant or harvest out of the key operating window. It is designed principally for the silage producer who wants a quick turnaround with an excellent yielding/quality corn silage for its maturity.

Best grown from Southern VIC through to TAS, SA and WA. Growers seeking a very quick, high yielding, excellent standability and disease tolerant package, should be growing *Asterix*. Producing high quality 'starchy' feed grain and silage yields. It is the second quickest maize on the Australian market.

<b>Plant Type:</b>
<b>83 Days CRM Quick Grain or Silage</b>
<b>Yield Potential:</b>
<b>Excellent yields with a solid disease package.</b>
<b>Plant Height:</b>
<b>Medium height plant with a solid root structure.</b>
<b>Grain Type:</b>
<b>Dent x Flint highly digestible feed grain. High Starch content in grain and silage.</b>
<b>General Comments:</b>
<b>Quick yields that fill a specific purpose.</b>
