

Bolt-IT NEW

Introducing **Bolt-IT** - a new 96 CRM imi-tolerant corn hybrid from HSR Seeds.

With a greatly improved yield for its maturity, **Bolt-IT** is the fastest maturing IT maize in the Australian and New Zealand markets.

It is recommended to be grown in all temperate regions from Queensland south under high populations and growing inputs.

Growers seeking a reliable, high yielding, excellent standability and stress tolerance in an early-maturing maize hybrid,

producing high quality grain and silage yields. **Bolt-IT** offers fantastic 'plasticity' or the ability to be adaptable to the environment it is grown.

The flexibility in **Bolt-IT** allows you to apply Lightning® Herbicide over the plant for excellent post-emergent broadleaf and grass weed control (Please read the label). **Bolt-IT** offers a double-cropping option or re-cropping options where there are soil residues of imi-herbicides present.

Plant Type:
96 Days CRM Grain and Silage
Yield Potential:
Excellent top end yields with great plasticity.
Plant Height:
Tall and straight plant structure.
Grain Type:
Medium, high starch. Bright yellow grain.
General Comments:
Imidazolinone herbicide tolerant. Zero plant-back interval.

PLANTING POPULATIONS

<p>Dryland below 600mm</p> <p>20,000 TO 35,000 ESTABLISHED</p>	<p>Dryland above 600mm</p> <p>35,000 TO 70,000 ESTABLISHED</p>	<p>Full Irrigation</p> <p>70,000 TO 95,000 ESTABLISHED</p>
