

Zeus-IT

Zeus-IT is the new release 100 CRM imi-tolerant corn hybrid from HSR Seeds.

With a greatly improved yield for its maturity, **Zeus-IT** is one of the fastest maturing IT maize hybrids in the Australian and New Zealand markets.

It is recommended to be grown from temperate regions in Queensland south to Victoria through to Tasmania and Western Australia under high populations and growing inputs.

Growers seeking a reliable, high yielding, excellent standability and stress tolerance in a early-maturing maize hybrid, producing high quality grain and silage yields.

Zeus-IT offers fantastic ‘plasticity’ or the ability to be adaptable to the environment it is grown.

The flexibility in **Zeus-IT** allows you to apply Lightning Herbicide over the plant for excellent post-emergent broadleaf and grass weed control (please read the label).

Zeus-IT also offers opportunities for double cropping or recropping options where there are soil residues of imiherbicides remaining from previous crops.

Plant Type:
100 Days CRM Grain and Silage
Yield Potential:
Excellent top end yields with great plasticity.
Plant Height:
Medium-tall and leafy plant structure.
Grain Type:
Medium; high starch. Bright yellow kernels.
General Comments:
Imidazolinone herbicide tolerant. Zero plant-back interval.
