

Goliath

Introducing HSR Seeds 110 day feed/silage corn. *Goliath* is a hybrid that has very high water use efficiency. It is designed principally for the grower who wants a large robust plant with an excellent grain yield or high yielding/quality corn silage.

Best grown from Southern QLD through to Central VIC. Growers seeking a reliable, high yielding, excellent standability and disease tolerant package in a mid-maturing maize hybrid, should be growing *Goliath*. Producing high quality feed grain and silage yields. Farmers that want a stable hybrid that has performed exceptionally well across quicker environments should look at *Goliath*.

Plant Type:
110 Days CRM Grain or Silage
Yield Potential:
Excellent yields with excellent disease package.
Plant Height:
Tall plant with large root structure for high WUE.
Grain Type:
Dent x Dent highly digestible feed grain. High Starch content in grain and silage.
General Comments:
Consistent and solid yields under wide range of conditions. High yielding grain with a good balance between stay green and dry down.

PLANTING POPULATIONS

Dryland below 600mm	Dryland above 600mm	Full Irrigation
20,000 TO 35,000 (SILAGE 30-45 K) ESTABLISHED	35,000 TO 70,000 (SILAGE 45-80 K) ESTABLISHED	70,000 TO 95,000 (SILAGE 80-95 K) ESTABLISHED
